### **L-3 Security & Detection Systems Awarded a Five-Year Standing Offer with the Canadian Air Transport Security Authority**

WOBURN, Mass., June 27, 2012 – L-3 Security & Detection Systems (SDS) announced today that it has been awarded a five-year standing offer with the Canadian government to supply eXaminer<sup>®</sup> XLB explosives detection systems (EDS).

L-3's eXaminer XLB is the first certified dual-energy EDS specifically optimized for screening checked baggage in high-throughput airport environments. Capable of scanning over 1,200 bags per hour in-line, it keeps baggage continuously moving through a meter-wide scanner.

"The eXaminer XLB is the industry's highest-performing in-line CT EDS, providing superior availability, low false alarms, high bag clear rate and dual-energy capability," said Thomas M. Ripp, president of L-3 Security & Detection Systems. "We continue to invest in the eXaminer platform, future proofing to meet emerging threats and operational requirements within demanding airport environments."

The eXaminer XLB generates high-resolution 3-D image data for explosives detection by combining helical CT with dual-energy imaging. Using 3-D Continuous Flow CT technology, the system generates high-resolution medical-quality images in real time. With advanced tools that include 360-degree rotational views of entire bags and individual threat objects, operators can quickly and confidently clear bags for flight or designate bags for search.

To learn more about L-3's eXaminer XLB, visit our website at [www.sds.L-3com.com/auto\\_explv\\_detect/examinerxlb.htm](http://www.sds.L-3com.com/auto_explv_detect/examinerxlb.htm).

Since 1998, L-3 has used medical-grade imaging technology developed for aviation security with an understanding of the complex demands faced by airport personnel and regulatory agencies around the globe. Nearly 1,000 eXaminer systems have been deployed at airports domestically and internationally and supported by L-3's world-class service organization.

**About L-3 Security & Detection Systems**

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L-3 SDS, please visit the company's website at [www.L-3com.com/sds](http://www.L-3com.com/sds).

**About L-3 Communications**

Headquartered in New York City, L-3 employs approximately 61,000 people worldwide and is a prime contractor in C<sup>3</sup>ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and government services. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2011 sales of \$15.2 billion.
