For Immediate Release

L-3 Security & Detection Systems' Explosives Detection Solutions Receive China's CAAC Certification

WOBURN, Mass., February 12, 2014 – L-3 Security & Detection Systems (L-3 SDS) announced today that three eXaminer computed tomography (CT) explosives detection systems (EDS) have been certified by the Civil Aviation Administration of China (CAAC). The automated technology (AT) MVT-HR[®] system has also been certified.

“We’re pleased to add the CAAC to our list of certifications for our EDS product line. This will allow customers in China to screen for a wide range of threats as part of an ongoing commitment to passenger safety,” said Thomas M. Ripp, president of L-3 Security & Detection Systems. “We value our relationship with the CAAC and are dedicated to providing advanced technology that will allow them to adapt to an ever-changing threat environment.”

L-3 SDS' comprehensive portfolio of hold baggage systems includes TSA-certified and EU-approved EDS solutions for every throughput class, from the compact eXaminer SX to the widely deployed eXaminer 3DX to the high-speed, dual-energy eXaminer XLB, and the MVT-HR, an automated high-speed, high throughput system. With advanced tools that include 360-degree rotational views of entire bags and individual threat objects, the eXaminer systems allow operators to quickly and confidently clear bags for flight or designate bags for search.

Since 1998, L-3 SDS has used medical-grade imaging technology to meet the complex aviation security demands faced by airport personnel and regulatory agencies around the globe. Over 1,000 eXaminer systems have been deployed at airports domestically and internationally and are supported by L-3's world-class service organization. To learn more about L-3's eXaminer portfolio, visit <http://www.sds.l-3com.com/products/explosivedetect.htm>.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (L-3 SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3 Communications

Headquartered in New York City, L-3 employs approximately 48,000 people worldwide and is a prime contractor in C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, platform and logistics solutions, and national security solutions. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2013 sales of \$12.6 billion.
